Product type	Borg Accessories

Product Description

The Borg 4000 Series Gaskets (Part Number: S402) are high-quality replacement sealing gaskets designed specifically for Borg 4000 series mechanical digital locks. Positioned between the lock body and the door face, these gaskets provide a vital weather-resistant barrier that helps prevent the ingress of moisture, dust, and dirt into the lock's internal mechanism.

Over time, original gaskets can become compressed, worn, or damaged. Replacing them during routine maintenance ensures your digital lock remains fully protected against the elements, extending the lifespan and reliability of your security hardware.

Technical Specifications

- **Manufacturer:** Borg Locks
- **Part Number:** S402
- **Compatibility:** Borg 4000 series digital locks
- **Material:** Rubber
- **Colour:** Black

Key Features

- **Weather Protection:** Seals the gap between the lock body and the door surface to prevent moisture and dust ingress.
- **Genuine Replacement Part:** Designed specifically by Borg to ensure a perfect fit and reliable performance.
- **Protects Internal Components:** Helps safeguard the mechanical lock mechanism from environmental damage.
- **Easy to Install:** Fits directly behind the keypad and inside lock bodies during installation or maintenance.
