Product type	Borg Accessories

Product Description

The Borg 4000 Series XL Fixing Kit is a genuine accessory designed to extend the installation capabilities of your Borg 4000 series mechanical digital locks.

Standard digital locks are typically supplied with fixing hardware suitable only for standard door thicknesses. When installing on deeper doors, heavy timber gates, or insulated commercial doors, standard screws are often too short. This extra-long (XL) fixing pack is specifically engineered to bridge that gap, allowing you to securely install your Borg 4000 series lock on doors up to 85mm thick.

Using genuine Borg parts ensures perfect thread compatibility and maintains the structural integrity and security of your digital lock.

Technical Specifications

- **Compatibility:** Borg 4000 series digital locks
- **Maximum Door Thickness:** Up to 85mm
- **Fixing Type:** Extra-long (XL) screws

Key Features

- **Extended Capability:** Enables secure installation on thick doors and gates up to 85mm.
- **Genuine Borg Part:** Guarantees perfect thread compatibility and reliable performance.
- **Robust Security:** Maintains the structural integrity and stability of your digital lock.
- **Versatile Application:** Ideal for heavy timber gates, insulated doors, and thick commercial doors.
