Product Description

The Borg 5000 series BL5400 Flat Bar Handle is a high-quality replacement internal handle unit designed specifically for the Borg BL5400 series of mechanical digital locks. Built for medium to heavy-duty applications, this flat bar lever handle provides a robust and ergonomic grip, making it an ideal choice for high-traffic environments.

This handle is designed to work seamlessly in combination with your existing BL5000 or BL5400 series keypad and fixing setup. It is perfect for retrofitting or replacing a damaged or worn internal handle without needing to replace the entire digital lock system. This specific variant (part number S549C) features a premium Polished Brass finish, offering a traditional and clean aesthetic that complements a wide range of interior doors.

Please note that this is the handle unit only; no keypad, latch, or locking device is supplied with this product.
