Specification Summary

Brand	Borg Accessories
Product type	Borg Accessories

Product Description

The Borg 5000 Series Inside Handle Return Spring is a genuine replacement part designed to restore the smooth, reliable operation of your digital door lock. Over time, the internal springs of heavily used locks can wear down or lose tension, causing the handle to sag or fail to return to its correct horizontal position.

This high-quality replacement spring is specifically engineered to suit all models within the Borg BL5000 series. By replacing a worn or broken spring, you can extend the lifespan of your existing lockset and avoid the cost of a complete replacement. It is a straightforward, cost-effective maintenance solution that ensures your mechanical digital lock continues to function safely and efficiently.

Technical Specifications

- **Brand:** Borg Locks
- **Compatibility:** Fits all Borg BL5000 series models
- **Component Type:** Inside handle return spring

Key Features

- **Genuine Replacement Part:** Designed specifically by Borg to ensure a perfect fit and reliable performance.
- **Restores Handle Action:** Replaces worn or broken springs to prevent handle sag and ensure the lever returns fully to the horizontal position.
- **Cost-Effective Maintenance:** Extends the service life of your existing BL5000 series digital lock without needing to replace the entire unit.
- **Durable Construction:** Made from high-quality materials to withstand frequent daily use.
