Specification Summary

Brand	Borg Accessories
Product type	Borg Accessories

Product Description

The Borg S524 is a replacement knob handle designed specifically for the Borg BL5000 and BL5400 series of mechanical digital locks. It offers a practical retrofit solution for situations where a standard lever handle is not suitable, or where a more compact profile is required to prevent clearance issues with walls and frames.

This knob is exceptionally easy to install. To fit, simply remove the grub screw on the existing lever handle, slide it off, and slot the new knob handle into place. It is finished in high-quality Satin Chrome, providing a clean, modern aesthetic that matches existing hardware.

Technical Specifications

- **Manufacturer:** Borg Locks
- **Part Number:** S524
- **Compatible Series:** Borg BL5000 and BL5400 models
- **Finish:** Satin Chrome
- **Type:** Replacement knob handle (knob only)

Key Features

- **Retrofit Solution:** Easily replaces existing lever handles on compatible Borg digital locks.
- **Simple Installation:** Quick to fit by removing the grub screw and slotting the new knob on.
- **Compact Profile:** Ideal for doors with tight clearance or where a lever handle is impractical.
- **Durable Finish:** Satin Chrome finish matches existing commercial and domestic hardware.
