Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The BL2401 ECP works as a direct lever handle upgrade for the standard BL2000 ECP series. Offering a medium duty rating and a free turning lever handle with all the holdback benefits of the Bl2200, this lock is designed as a direct upgrade for situations where a knob turn handle simply can’t be used by everyone.

Separating the Easicode Pro range from the conventional locks is the patented “On the door” code change method. With this, the long and drawn out method of removing tumblers from the back of the keypad is over, cutting down what could be a 10-15 minute job to one that takes only 30 seconds.

The keypad has been cycle tested for up to 50,000 cycles and has a potential of 4000 different combinations.

This lock comes with a anti-thrust tubular latch that comes in three different sizes: the 50mm, the 60mm and 70mm backsets. The BL2401 ECP is suited for internal, medium duty wooden and composite doors.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management -** for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
