Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg Locks BL2602 ECP is a robust, medium-duty mechanical digital lock designed to deliver reliable access control in the harshest outdoor environments. Part of Borg's renowned Marine Grade series, this lock features a specialist black e-plating finish that has been salt-spray tested for over 1,000 hours, alongside high-grade stainless steel internal components to resist rust and corrosion.

A standout feature is the patented Easicode Pro (ECP) "on-the-door" code change system. Unlike traditional digital locks that require time-consuming disassembly to change the code, the BL2602 ECP allows you to update the combination in under 30 seconds while the lock remains fitted to the door.

This model is equipped with a 28mm anti-thrust aluminium latch, making it an excellent choice for narrow-profile doors, timber gates, and composite doors. The external keypad features a knurled knob for a secure grip, while the inside is fitted with an ergonomic paddle handle. An optional holdback function is included, allowing the latch to be held back for free passage when restricted access is not required.

Technical Specifications

- **Brand:** Borg Locks
- **Model:** BL2602 ECP
- **Latch Type:** 28mm anti-thrust aluminium latch
- **Code Change Method:** Easicode Pro (on-the-door code change)
- **Combinations:** Over 4,000 potential code combinations
- **Cycle Testing:** Tested to 100,000 cycles
- **Corrosion Resistance:** Salt spray tested to over 1,000 hours (MG Pro 2 finish)
- **Internal Components:** Stainless steel
- **Door Thickness:** Suitable for doors and gates up to 85mm thick
- **Handing:** Fully reversible
- **Keypad Type:** Knurled knob keypad (outside)

- **Inside Handle:** Paddle handle with optional holdback function

Key Features

- **Easicode Pro (ECP) System:** Patented "on-the-door" code change mechanism allows quick code updates in under 30 seconds without removing the lock.
- **Marine Grade Protection:** Specialist e-plated finish and stainless steel internals provide exceptional weather resistance, ideal for coastal and harsh outdoor environments.
- **Narrow Profile Latch:** Supplied with a 28mm anti-thrust aluminium latch, perfect for narrow-stile doors and gates.
- **Convenient Inside Paddle Handle:** Features an optional holdback function to allow unrestricted passage when needed.
- **High Security Coding:** Offers over 4,000 unique keypad combinations for robust access control.
- **Extremely Durable:** Cycle-tested to 100,000 operations to ensure long-term performance.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management -** for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
