Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The BL3000 metal gate lock seres is another unique product from Borg. Combining a specially designed lockcase with their proven Marine Grade keypads we are able to offer the perfect access control solution for box section metal gates. The lockcase utilises a forend fixing system which increases security and ease of fitting.

The self-locking system has been designed with adjustability and ease of fitment in mind; the latchbolt can be adjusted to suit a variety of box section profiles whilst the latchbolt head is reversible to suit let and right hand hung gates.

Features:

- To suit gate profiles 30-60mm on standard fixings,
- DKO models now available with override and deadbolt function as standard,
- Free turning handle until the correct code is entered,
- XL latchbolt available to suit profiles up to 120mm (Part no. S311a)
- Anti-climb housing
- Over 8000 code combinations available
- Easily reversible on site
- Simple installation, two telescopic fixings,
- 1000 hours salt spray tested,
- Security fixings,
- 20mm bolt withdrawal.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management -** for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
