Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg BL4401 Wooden Gate Digital Lock comes standard with a 60mm stainless steel latch and optional holdback facility which can be removed if not required. This non-handed medium-heavy duty digital lock is suitable for use on doors with a thickness of up to 80mm and has been specially designed to suit wooden and timber external applications.

Coated with a Marine Grade Pro black finish which has been salt spray tested for over 1000 hours, you can be sure this unit will withstand the harshest of conditions.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management -** for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
