Product Description

The BL4400 series is a medium-heavy duty range specifically designed for use on external wooden and timber gate applications. Each model in the series uses the same free turning lever handle keypad for the popular BL3400 series; However supplied with a range of latches to suit wooden and timber gates.

Sharing the same footprint as the BL2600 series models the BL4400 series can be used as a medium-heavy duty lever handle upgrade. All units are supplied with the fixing kits to suit door thicknesses up to 80mm.

Features:

- Designed for use on wooden/timber gates and sheds,
- Free turning handle until the correct code is entered,
- 4409 available with rim fixed latch,
- 4402 and 4442 models supplied with 28mm backset narrow stile latch,
- 4401 and 4441 models supplied with 60mm tubular latch (50mm and 70mm available),
- Non-handed keypad-easily reversible on site,
- Over 8000 combinations possible,

- Optional holdback function (excl.4409),
- All models available as back to back (excl. 4409),
- New black Marine Grade Pro finish,
- 1000 hours salt sprayed tested.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management -** for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
