Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg BL5000 is a medium to heavy-duty mechanical digital lock designed for environments requiring robust access control. This specific model includes the external keypad and an internal round bar lever handle but is supplied **without a latch or locking device**. This makes it an ideal choice for retrofitting or integrating with an existing setup, such as an existing latch, compatible mortice lockcase, or panic hardware, utilizing its standard 8mm square drive.

To protect the internal mechanism from vandalism and forced entry, the BL5000 features a fully clutched handle. It also includes an optional free passage function, allowing you to temporarily deactivate the coding chamber for unrestricted, code-free entry during busy periods.

This digital lock is suitable for both internal and sheltered external doors. It is available in a choice of four finishes: Polished Brass, Polished Chrome, Satin Chrome, and Satin Stainless. Please select your preferred finish from the options below.

Technical Specifications

- **Brand:** Borg Locks
- **Model:** BL5000
- **Spindle:** 8mm square drive
- **Handing:** Fully reversible (non-handed)
- **Usage:** Suitable for internal and sheltered external doors

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management -** for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
