Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg Locks BL5400 is a medium to heavy-duty mechanical digital lock designed for demanding environments where lighter-duty locks may not suffice. This model features stylish flat bar lever handles and is supplied as a keypad and inside handle assembly **without a latch or locking device**. This makes it an ideal choice for retrofitting onto existing setups or when integrating with a pre-installed latch or lockcase.

Built for durability and reliability, the BL5400 features a clutched handle mechanism to protect the internal coding chamber against forced entry and vandalism. It also includes an optional free passage function, allowing users to

bypass the code requirement for unrestricted access when needed. Suitable for internal and sheltered external doors, it is fully reversible on-site to accommodate both left and right-handed doors.

This product is available in a choice of finishes, including Polished Brass, Polished Chrome, Satin Chrome, and Satin Stainless. Please select your preferred finish from the options below.

Technical Specifications

- **Manufacturer:** Borg Locks
- **Series:** BL5400
- **Handle Type:** Flat bar lever handle
- **Spindle Size:** 8mm square drive
- **Handing:** Non-handed (fully reversible on-site)
- **Code Combinations:** Over 2,000 potential combinations
- **Cycle Rating:** Tested to over 100,000 cycles
- **Compatibility:** Suitable for timber, composite, and steel doors (internal and sheltered external use)
- **Latch:** Not supplied (keypad and inside handle only)

Key Features

- **Clutched Handle:** Protects the lock's internal mechanism from damage if forced.
- **Free Passage Option:** Allows the code chamber to be bypassed for easy, unrestricted entry when required.
- **No Latch Supplied:** Perfect for retrofitting or pairing with existing locking hardware.
- **Robust Construction:** Designed for medium to heavy-duty applications.
- **Multiple Finishes:** Available in Polished Brass, Polished Chrome, Satin Chrome, and Satin Stainless to match your door hardware.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management -** for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
