Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg Locks BL5402 is a robust, medium-to-heavy-duty mechanical digital lock designed specifically for narrow-stile and aluminium doors. Equipped with a 28mm backset aluminium latch, this digital lock is ideal for both internal and sheltered external applications where reliable access control is required.

This model features a sleek, flat bar handle on both the keypad and the inside unit, ensuring comfortable and easy operation. To protect the internal locking mechanism from forced entry and vandalism, the keypad handle is fully clutched, allowing it to rotate freely until the correct code is entered. It also includes an optional free passage mode, which can be enabled to temporarily bypass the coding chamber for unrestricted access during busy periods.

The BL5402 is non-handed and fully reversible on-site, making it highly versatile for a range of door configurations. It is available in a choice of high-quality finishes, including Polished Brass, Polished Chrome, Satin Chrome, and Satin Stainless. Please select your preferred finish from the options below.

Technical Specifications

- **Backset:** 28mm
- **Latch:** Aluminium latch
- **Handle Style:** Flat bar handle (inside and outside)
- **Handing:** Non-handed (fully reversible)
- **Keypad:** 12 large indented stainless steel buttons
- **Finishes:** Polished Brass, Polished Chrome, Satin Chrome, Satin Stainless

Key Features

- **Clutched Handle:** Keypad handle rotates freely when locked to prevent damage from forced entry and vandalism.
- **Narrow Stile Design:** 28mm backset latch makes it ideal for aluminium and narrow-stile doors.
- **Free Passage Mode:** Optional bypass function allows free entry without entering the code when required.
- **Durable Construction:** Cast housing with stainless steel buttons, cycle-tested for long-lasting reliability.
- **Reversible Handing:** Easily configured on-site for left or right-handed doors.
- **Choice of Finishes:** Available in multiple finishes to suit your door hardware - please select from the options below.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management -** for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
