Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The BL6000 Series is a new and unique coding system designed, engineered, manufactured and assembled in our factory. Incorporating a single column of 8 buttons, the 6000 offers a patented high security double button press-coded method of access control. Each digit can be set as one or two button press and therefore the same digit can be set twice in the code.

With a body width of just 45mm the 6000 is primarily designed to be fitted onto narrow stile door sections be it PVC, Aluminium, composite or wood. The free turning handle is permanently clutched to provide no handle resistance

until the correct code is entered.

Features:

- Patented double button press design allowing a greater level of security,
- Over 2100 different code combinations,
- 70 handle rotation ideal for multi-point locks,
- Free turning handle until the correct code is entered,
- No tumbler or pins to remove to change code,
- 196mm fixing centres,
- Optional free passage function,
- Narrow housing perfect for PVC, aluminium, composite or wood,
- Tested to over 100,000 cycles,
- Suitable for external applications,

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management -** for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
