Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

Description

The BL7000 ECP is our solution to the heavy duty specification, ideal for high traffic areas.

Coming in our black MG Pro 2 finish, this unit has increased UV protection and protection from the elements allowing it the ability to survive in the toughest conditions. This finish is 1000 hours salt water tested.

This lock was manufactured with stainless steel coding to ensure it’s longevity and allowing it to operate externally. This variation on the BL7000 series does not come fitted with any latch and is designed to work with a pre-fitted set up or as a replacement keypad.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management -** for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
