Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg Locks BL7001 Marine Grade Pro with Easicode Function (BL7001 MG Pro ECP) is a heavy-duty, external-grade digital keypad lock designed for high-traffic areas and demanding environments. Featuring a robust tubular latch, this lock is engineered to survive the toughest conditions, making it ideal for coastal installations, external gates, and heavy-use commercial doors.

A standout feature is the Easicode Pro (ECP) system, which allows for quick and secure code changes directly on the door in under 15 seconds, eliminating the need to remove the lock. The BL7001 is finished in a specialised black Marine Grade Pro 2 coating, which has been salt-spray tested for 1,000 hours to ensure exceptional resistance to corrosion, UV rays, and harsh weather.

Designed with retrofitting in mind, the BL7001 shares a footprint with other popular heavy-duty locks on the market, such as the Unican 1000 and 5000, allowing for a straightforward upgrade. It features a free-rotating keypad lever that only engages when the correct code is entered, an optional free passage function, and a high-quality stainless steel coding chamber for ultimate durability.

Technical Specifications

- **Manufacturer:** Borg Locks
- **Model:** BL7001 MG Pro ECP
- **Latch Type:** 60mm tubular latch
- **Finish:** Black Marine Grade Pro 2 (1,000-hour salt-spray tested)
- **Internal Components:** 316-grade stainless steel
- **Door Thickness:** Suitable for doors 35mm to 80mm thick
- **Handing:** Reversible (non-handed)
- **Code Length:** 1 to 10 digits (over 1,000 possible combinations)
- **Fire Rating:** Independently fire tested to BS EN 1634-1 (30 and 60-minute timber doors when used with an intumescent kit, sold separately)
- **Compatibility:** Shares footprint with Unican 1000 & 5000 series for easy retrofitting

Key Features

- **Easicode Pro (ECP) System:** Allows quick, secure code changes directly on the door in seconds without removing the lock.
- **Marine Grade Protection:** Specialised black finish and stainless steel internals provide superior resistance to UV, weather, and salt-water corrosion.
- **Heavy-Duty Performance:** Designed specifically for high-traffic, external applications on timber, composite, and steel doors.
- **Clutch Protection:** Free-rotating lever handle prevents damage from forced entry attempts when the lock is disengaged.
- **Optional Free Passage:** Internal handle allows a free passage function to keep the door unlocked when required.
- **Easy Retrofitting:** Shared footprint with industry-standard heavy-duty locks makes upgrading quick and simple.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management -** for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
