Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The BL7000 ECP is our solution to the heavy duty specification, ideal for high traffic areas.

The keypad lever is free rotating and only engages with the clutch and 8mm spindle drive until the correct code of key is entered. This lock was manufactured with stainless steel coding to ensure it’s longevity and allowing it to operate externally. This variation on the BL7003 ECP series comes with a 60x72mm lockcase with an optional slot for a standard euro key cylinder for deadbolting.

The unit is a heavy duty lock and is suitable for use internally and externally on wooden, composite and steel doors.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management -** for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
