Specification Summary

Brand	Bramah
Product type	Sliders

Product Description

The Bramah MD27 is a premium, high-security mortice deadlock designed specifically for timber doors. Manufactured by the historic British brand Bramah, this lock combines robust physical construction with their renowned high-security radial slider mechanism to deliver exceptional protection for residential and commercial properties.

Constructed with a hardened steel case and a hardened deadbolt, the MD27 is engineered to resist aggressive physical attacks, including drilling and sawing. The deadbolt is operated by a key from either side, making it a highly secure solution for doors with a standard 12.5mm (1/2") stop.

At the heart of the lock is Bramah’s signature 7-slide mechanism, which provides over 500,000 unique key differs. This intricate design offers superb resistance to lock picking and manipulation. The lock is supplied Keyed to Differ as standard, with Keyed Alike (KA) and Master Keyed (MK) suites available as special orders to suit your specific security requirements.

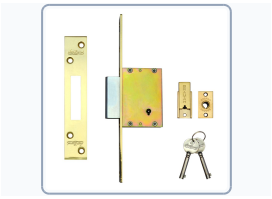

Technical Specifications
