Product type	Overhead

Product Description

The Briton 1110 Size 2-4 Overhead Door Closer is a compact, highly reliable solution designed for medium-duty applications, making it ideal for offices, commercial premises, and living accommodations. This versatile door closer features template-adjustable power sizing from EN 2 to 4, allowing it to be tailored to the specific requirements of your door.

With a reversible design, it is suitable for both left-handed and right-handed doors. It supports multiple mounting applications (Figure 1, Figure 61, and Figure 66) to provide maximum installation flexibility. The closer is equipped with separate, adjustable closing and latch speeds, which are concealed behind a sleek trimplate to prevent unauthorised tampering.

It is fully certified for use on fire doors, carrying Certifire CF388 approval and testing to BS EN 1154 and EN 1634 standards. Finished in a durable silver enamelled coating with a matching arm, this closer offers a neat, uniform appearance alongside a robust 10-year manufacturer's guarantee.

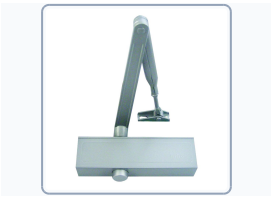

Technical Specifications

- **Brand:** Briton
- **Manufacturer Reference:** 1110
- **Power Size:** EN 2 - 4 (template adjustable)
- **Application:** Fig 1 (pull side), Fig 61 (transom mount), and Fig 66 (parallel arm)
- **Finish:** Silver Enamelled

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
