Specification Summary

Brand	Briton
Product type	Overhead

Product Description

The Briton 1120B is a high-quality, power-adjustable overhead door closer designed for medium to high-traffic applications, such as offices, commercial properties, and living accommodations. It offers a spring-adjustable power size of EN 2-4, making it highly versatile for various door sizes and weights.

This door closer features independent hydraulic controls for closing speed and latch action, along with a built-in adjustable backcheck. The backcheck provides a cushioning effect when the door is opened with excessive force, preventing damage to the door, frame, and adjacent walls - ideal for busy environments. For added security and to prevent tampering, the adjustment valves are concealed.

The Briton 1120B is fully certified for use on fire doors, offering up to 2 hours of fire resistance on timber doors. It is CE and UKCA marked, Certifire approved (CF388), and tested to EN 1154 and EN 1634 standards. It is non-handed and fully reversible, allowing for easy installation on both left and right-handed doors across multiple mounting configurations (Fig 1, Fig 61, and Fig 66).

Technical Specifications

- **Brand:** Briton
- **Power Size:** EN 2-4 (adjustable)
- **Application:** Fig 1 (pull side), Fig 61 (transom mount), and Fig 66 (parallel arm)
- **Max Door Width:** 1100mm

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
