Specification Summary

Brand	Briton
Product type	Overhead

Product Description

The Briton 121CE is a compact, fixed power size EN 3 overhead door closer, offering a highly versatile and cost-effective solution for light to medium-duty applications. It is suitable for both fire and non-fire timber doors up to 950mm wide and weighing up to 60kg.

This door closer is fully certified for multiple mounting applications, including regular door mount (pull side), transom mount (push side), and parallel arm (push side). It features fully adjustable closing speed and latching action, allowing you to easily customise the closing cycle to suit your specific environment. It is also non-handed (reversible), making it suitable for both left and right-handed doors.

Tested to BS EN 1154 and EN 1634 standards, the Briton 121CE is CE and UKCA marked, Certifire approved (CF390), and fire-rated for up to 2 hours on timber fire doors. It comes complete with a 10-year manufacturer's guarantee for long-term reliability.

This product is available in multiple finishes, including Gold Enamelled and Silver Enamelled, with different barcodes depending on your selection. Please choose your preferred finish and barcode option from the list below.

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
