Specification Summary

Brand	Briton
Product type	Outside Access Device

Product Description

The Briton 1413EKE is a robust, knob-operated outside access device (OAD) designed to provide secure external entry through doors fitted with Briton panic and emergency exit hardware. It is ideal for commercial and high-traffic environments where authorised keyholders require reliable access from the outside.

Featuring an ergonomic knob designed to offer improved grip even in wet conditions, this device is both practical and durable. It comes supplied complete with a 40mm Euro profile cylinder, allowing immediate installation and operation. For added convenience, the cylinder can be keyed alike in-house to match your existing security setup.

This versatile unit is fully reversible, making it suitable for both left and right-handed doors. It is designed for straightforward installation on timber or metal doors between 40mm and 70mm thick.

Technical Specifications

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
