Specification Summary

Brand	Briton
Product type	Overhead

Product Description

The Briton 2130B is a high-performance, spring-adjustable overhead door closer designed for heavy-duty and high-traffic applications. Featuring a robust cast iron body, a hardened steel rack and pinion mechanism, and needle roller bearings, this closer ensures exceptionally smooth and reliable operation.

Its built-in adjustable backcheck provides resistance when the door is opened with excessive force, preventing damage to the door and surrounding frame. To ensure year-round reliability, the closer utilizes high-quality hydraulic fluid with built-in temperature compensation, eliminating the need for seasonal adjustments.

Installation is quick and precise thanks to the unique Accufit self-adhesive template and pre-assembled armset. Additionally, the stylish classic 'C' cover conceals all fixings and adjustment screws, preventing unauthorized tampering and maintaining a clean aesthetic. Fully certified for fire doors and high-traffic environments, the Briton 2130B is a dependable choice for commercial, healthcare, and educational settings.

Technical Specifications

- **Power Size:** EN 2 to 6 (adjustable)

- **Maximum Door Width:** 1400mm
- **Maximum Door Weight:** 120kg
- **Mechanism:** Hardened steel rack and pinion with needle roller bearings
- **Body Material:** Durable cast iron
- **Finish:** Silver Enamelled
- **Handing:** Reversible (non-handed)
- **Fire Rating:** EN 1634 fire tested up to 2 hours on timber doors

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
