Specification Summary

Brand	Briton
Product type	Overhead

Product Description

The Briton 2400 series of Concealed Cam Action Door Closers combines innovative design with advanced cam-action technology, making it the ideal choice for environments where a discreet, high-performance door closer is preferred. Because the closer body is mounted within the top of the door and the slide track is fitted inside the head frame, this device remains fully concealed when the door is closed, offering excellent resistance to tampering and a

clean, aesthetic finish.

This non-handed closer is suitable for all popular applications and provides a maximum opening angle of 120°. The low initial opening forces of the cam-action design ensure easy operation and accessibility for users, while still maintaining the necessary closing force for fire safety. It features fully adjustable closing speeds from a 120° opening down to the final 7°, alongside an adjustable latch action to ensure a secure close. Fully adjustable to EN power sizes 2 to 4, this closer is CE marked for EN compliance and fire tested to EN 1634 standards on timber doors to achieve a 1-hour fire rating.

This door closer is available in multiple finishes, including Satin Stainless Steel and Silver Enamelled, with corresponding manufacturer references 2420.T.SS and 2420.T.SE. Please select your preferred finish, manufacturer reference, and barcode from the options below.

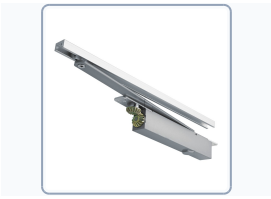

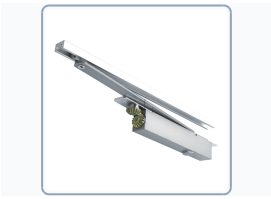

Technical Specifications

- **Brand:** Briton
- **Power Size:** EN 2 to 4 (fully adjustable)
- **Maximum Door Width:** 1100mm
- **Maximum Door Weight:** 80kg
- **Dimensions:** 24.2cm (Length) x 42mm (Width) x 32mm (Body Height)
- **Overall Height:** 62mm (including arm)
- **Standards:** BS EN 1154, CE Marked
- **Fire Rating:** 1-hour fire rated on timber doors (EN 1634)
- **Handing:** Non-handed

Key Features

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
