Specification Summary

Brand	Briton
Product type	Panic Latch

Product Description

The Briton 372E Push Pad Vertical Bolt is a high-quality emergency exit device designed to facilitate quick and safe egress from a building. Suitable for single doors and non-rebated double doors, this surface-mounted vertical bolt is operated by a simple push pad. When the pad is depressed, the top and bottom bolts disengage immediately, allowing the door to open.

To protect against external tampering, the unit features an integrated anti-thrust device that prevents unauthorised retraction of the latch bolts. It is fully reversible, making it suitable for both left and right-handed doors, and features adjustable top and bottom shoots to ensure a precise fit during installation.

Certified to BS EN 179, the Briton 372E is ideal for commercial and public buildings where personnel are familiar with the escape routes. It is finished in a durable silver enamelled coating and comes with a 5-year manufacturer's guarantee.

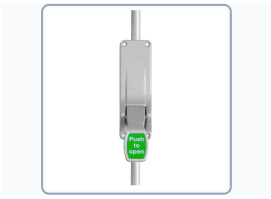

Technical Specifications

- **Brand:** Briton
- **Manufacturer Reference:** 372E
- **Finish:** Silver Enamelled
- **Handing:** Reversible (suitable for left or right-handed doors)
- **Maximum Door Height:** 2415mm
- **Maximum Door Width:** 1300mm
- **Standards:** BS EN 179 Certified

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
