Specification Summary

Brand	Briton
Product type	Panic Bolt

Product Description

The Briton 376 ELT Extra Long Top Shoot Bolt is a specialised accessory designed for use with the Briton 370 series of panic and emergency exit hardware, including the Briton 376 panic bolt and Briton 372 push pad.

This extended top shoot bolt extends to 1950mm, providing a practical solution for oversized doors up to 3350mm high. It is also ideal for installations where the horizontal push bar or emergency exit pad needs to be mounted lower down on the door, such as in primary schools, nurseries, and other public buildings where children or individuals with limited reach require easy access.

Constructed from durable steel with a powder-coated finish, the 1950mm rod can be easily cut on-site to achieve a precise fit for your specific door dimensions. It integrates seamlessly with your existing exit hardware, maintaining the integrity of the two-point locking system to ensure both reliable security and immediate egress in an emergency.

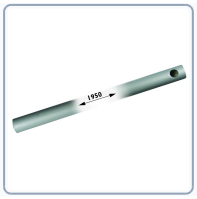

Technical Specifications

- **Brand:** Briton
- **Manufacturer Reference:** 376ELTS-SE
- **Finish:** Grey (Sprayed Silver)
- **Rod Length:** 1950mm
- **Compatibility:** Briton 376, 376.D, 376.P, 376.PD, 376.A, and 372 exit hardware
- **Maximum Door Height:** Up to 3350mm
- **Weight:** 1kg

Key Features

- **Extended Reach:** Extends to 1950mm, allowing panic hardware to be installed on doors up to 3350mm high.
- **Low-Level Mounting:** Ideal for schools and public buildings where the push bar needs to be positioned lower for children or users with limited reach.
- **On-Site Customisation:** The steel rod can be cut on-site to ensure a perfect fit for non-standard door heights.
- **Durable Finish:** Features a powder-coated finish for enhanced durability.
- **Maintains Security:** Works seamlessly with the Briton 370 series to preserve the integrity of the two-point locking system.

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
