Brand	Briton
Product type	Accessory

Product Description

The Briton 376 Series Metal Door Strike (376MDS/ZP) is a robust, high-quality accessory designed specifically to integrate with Briton 376 Series panic hardware. Engineered for use with vertical panic bolts on metal doorsets, this strike set provides a secure and dependable latching point, ensuring the reliable operation of emergency exit systems.

Constructed from solid metal with a durable zinc-plated finish, this strike set is built to withstand the demands of heavy daily use. The set comprises two strike plates and one trip plate, which is designed to activate the top tripper of the panic hardware.

For ease of installation and maintenance, the strike plates feature integrated screw slots. These slots allow for quick and simple adjustments on-site, ensuring precise alignment with the vertical bolts for smooth, trouble-free operation. Whether you are replacing a worn component or completing a new installation, the Briton 376MDS/ZP offers a reliable and robust solution for metal door emergency exits.

Technical Specifications

- **Brand:** Briton
- **Part Number:** L31134
- **Manufacturer Reference:** 376MDS/ZP
- **Barcode:** 5050640042941
- **Finish:** Zinc Plated
- **Material:** Solid metal
- **Compatibility:** Briton 376 Series panic hardware (vertical panic bolts)
- **Weight:** 100g

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
