Specification Summary

Brand	Briton
Product type	Accessory

Product Description

The Briton 376/492/SE is a genuine replacement top shoot designed specifically for use with Briton 376 Series panic hardware, including the Briton 372 and 376 escape devices. This precision-crafted component is essential for maintaining the safe and reliable operation of your emergency exit doors, ensuring compliance and security are never compromised.

Constructed from solid steel, this top shoot is built to withstand the demands of everyday use in busy commercial and public environments. It features a high-quality silver enamelled finish that matches the standard aesthetic of the Briton 376 range. Measuring 1.18 metres in length, the tubular rod can be easily cut to size on-site, allowing for a precise fit tailored to your specific door height.

Whether you are replacing a damaged component or restoring an existing emergency exit system, this genuine Briton spare part ensures a seamless fit and hassle-free installation.

Technical Specifications

- **Brand:** Briton
- **Manufacturer Reference:** 376/492/SE
- **Part Number:** L31131

- **Length:** 1.18m
- **Finish:** Silver Enamelled
- **Material:** Solid steel
- **Compatibility:** Suits Briton 376 Series panic hardware (including Briton 372 and 376 models)
- **Weight:** 200g

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
