Specification Summary

Brand	Briton
Product type	Panic Bolt

Product Description

The Briton 376E Single Panic Bolt is a highly reliable, surface-mounted push bar exit device designed to provide safe and easy egress in an emergency. Suitable for use on single doors and non-rebated double doors, this two-point locking panic bolt features a reversible design (self-handed) and is ideal for public buildings where users may not be familiar with the exit routes.

Constructed with durability in mind, the 376E features adjustable top and bottom shoots, along with a tubular steel cross bar and shoots that can be conveniently cut on-site to fit the exact dimensions of your door. Security is enhanced by an integrated anti-thrust device, which prevents unauthorised forced retraction of the latch bolts from the outside, and an automatic top catch that holds the bolts securely in place when the door is closed. It has been rigorously tested in excess of 200,000 cycles and is fire tested to EN 1634 for up to 2 hours on timber doors.

Technical Specifications

- **Brand:** Briton
- **Model:** 376E
- **Finish:** Silver Enamelled
- **Standards:** BS EN 1125, CE Marked (AAA011), UKCA Marked
- **Certifire Approval:** CF5506
- **Fire Tested:** EN 1634 (up to 2 hours on timber doors, up to 4 hours on steel doors)
- **Max Door Height:** 2500mm
- **Max Door Width:** 1300mm
- **Max Door Weight:** 200kg
- **Handing:** Reversible (self-handed)
- **Cycle Tested:** In excess of 200,000 cycles

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
