Specification Summary

Brand	Briton
Product type	Panic Bolt

Product Description

The Briton 377 is a high-performance push bar panic exit set designed specifically for rebated double doors. This complete emergency hardware solution comprises a Briton 376 vertical panic bolt, a Briton 378 rim panic latch, and a 378DDS double door strike. It is ideal for high-traffic public buildings such as schools, hospitals, and retail spaces where occupants require quick, intuitive egress in an emergency.

Engineered for safety and security, the Briton 377 features an anti-thrust mechanism that prevents the unauthorised retraction of the latch bolt from the outside. It includes adjustable top and bottom shoots for a precise fit, alongside an easy-clean floor socket to prevent dust and debris build-up.

The set is supplied handed but is fully site-reversible, offering maximum flexibility during installation. Additionally, the tubular steel cross bar and vertical shoots can be cut down on-site to perfectly match your door's dimensions.

Technical Specifications

- **Brand:** Briton
- **Standards:** BS EN 1125
- **Finish:** Silver Enamelled
- **Handing:** Right Hand (fully site-reversible)
- **Maximum Door Height:** 2415mm (suits doors up to 2500mm)

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
