Specification Summary

Brand	Briton
Product type	Accessory

Product Description

The Briton 378DDSSE is a premium double door strike designed specifically for double rebated timber door applications. It serves as an essential accessory for securing emergency and panic exit hardware, ensuring reliable operation when it matters most.

This strike is engineered for configurations where the first opening (active) leaf is fitted with a rim panic latch - such as the Briton 378E, 377E, or 1438E - and the second opening (passive) leaf is equipped with a vertical panic bolt. By providing a secure and precise latching point, it allows both doors to function seamlessly together while maintaining safe, unhindered egress in an emergency.

Featuring a durable silver enamelled (SE) finish, the strike perfectly complements the Briton 370 Series of panic hardware. It is screw-fixed for a straightforward, robust installation.

Technical Specifications

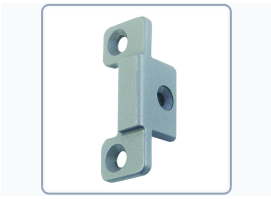

- **Brand:** Briton
- **Manufacturer Reference:** 378DDSSE
- **Finish:** Silver Enamelled (SE)
- **Compatibility:** Briton 378E, 377E, and 1438E exit hardware

- **Door Type:** Double rebated timber doors

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
