Specification Summary

Brand	Briton
Product type	Panic Latch

Product Description

The Briton 379EN (also known as the 379.N) is a high-quality, surface-mounted push bar panic exit device integrated with a mortice panic nightlatch. Designed for single doors and the active leaf of non-rebated double doors (when paired with a Briton 376 panic bolt), it is ideal for public and commercial buildings where reliable emergency egress and enhanced security are required.

This robust exit device features an anti-thrust mechanism that prevents forced latch retraction from the outside, offering additional protection against unauthorised entry. The dual-profile lockcase is highly versatile, accepting both Euro and oval profile cylinders (please note, the cylinder is not supplied).

For ease of installation, the Briton 379EN is fully site-reversible to suit both left and right-handed doors. The tubular steel crossbar can also be cut down on-site to perfectly match your door's width. Supplied complete with all necessary fixings and self-adhesive "Push Bar to Open" signage, this unit is tested in excess of 200,000 cycles and is fully certified to BS EN 1125.

Technical Specifications

- **Brand:** Briton
- **Manufacturer Reference:** 379.N.SE

- **Standards:** BS EN 1125
- **Finish:** Silver Enamelled
- **Handing:** Reversible (non-handed)
- **Maximum Door Width:** 1210mm
- **Cylinder Type:** Accepts Euro or oval profile cylinders (not supplied)
- **Weight:** 3.2kg

Key Features

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
