Specification Summary

Brand	Briton
Product type	Nightlatches

Product Description

The Briton 5250-57 is a versatile, dual-profile mortice nightlatch case designed to provide reliable security and smooth operation for both commercial and domestic doors. This high-quality lock case is uniquely compatible with both Euro profile and oval cylinders, featuring a robust steel case with an included conversion plate to easily switch between cylinder types.

Engineered for flexibility, the lock features a fully reversible latchbolt to suit both left and right-handed doors. It also includes an anti-thrust bolt to prevent external manipulation of the latch when the door is closed, making it an excellent choice for doors integrated with access control systems. For added convenience, a hold-back function can be engaged using a knurled wheel on the forend, allowing the latch to be held retracted when free passage is required.

This nightlatch case is available in a choice of finishes, including Polished Brass and Stainless Steel, to match your existing door hardware. Please select your preferred finish from the options below.

Technical Specifications

- **Brand:** Briton
- **Manufacturer Reference:** 5250-57
- **Backset:** 57mm
- **Case Depth:** 76mm
- **Case Height:** 108mm
- **Centres:** 48mm

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
