Specification Summary

Brand	Briton
Product type	Accessory

Product Description

The Briton 560 & 570 Series Adjustable Strike is designed specifically for use with Briton 560 and 570 Series panic hardware installed on UPVC (PVCu) doors. This high-quality accessory is engineered to work seamlessly with top or side pullman latches, ensuring reliable and secure door operation.

Featuring integrated screw slots, this strike plate allows for quick and easy adjustment during installation or maintenance. It offers a flexible projection of 17mm to 24mm, making it highly adaptable to varying door frame profiles. Finished in a sleek black, it provides a durable and discreet solution that complements your existing exit

hardware setup.

Technical Specifications

- **Brand:** Briton

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
