Specification Summary

Brand	Briton
Product type	Accessory

Product Description

The Briton 560 Series Alarm Switch Kit (566.AK) is a dedicated accessory designed for integration with Briton 560 Series panic hardware. This kit allows standard panic exit devices to be connected to electronic door control systems or audio/visual alarms, providing immediate notification whenever the emergency exit is operated.

By mounting directly into the end box of the panic operator, the switch detects when the push bar is depressed. This ensures that any unauthorised use of the exit door is instantly flagged, enhancing the security of your commercial or public building. The door cannot be opened without the connected system being activated, making it an ideal solution for monitoring fire exits and emergency doors without restricting their essential life-safety functions.

Supplied in a black finish, this kit is a simple yet highly effective upgrade for access control and security monitoring systems.

Technical Specifications

- **Brand:** Briton
- **Manufacturer Reference:** 566.AK
- **Part Number:** L31136
- **Compatibility:** Briton 560 Series panic hardware
- **Finish:** Black
- **Pack Quantity:** 1
- **Weight:** 200g
- **Barcode:** 5056240116327

Key Features

- **Immediate Notification:** Triggers an alert when the panic hardware is operated, notifying security of door usage.
- **System Integration:** Connects standard panic exit devices to electronic audio/visual alarms or door control systems.
- **Discreet Mounting:** Fits neatly inside the end box of the panic operator.
- **Enhanced Security:** Helps monitor emergency exits and prevent unauthorised door use.
- **Genuine Briton Accessory:** High-quality construction designed to work seamlessly with the Briton 560 Series.

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
