Specification Summary

Brand	Briton
Product type	Accessory

Product Description

The BRITON 570 Series Dogging Device Kit is a practical accessory designed specifically for use with Briton 570 Series panic hardware (excluding the Briton 573). This manual hold-open device is operated by a key, holding the latches in a withdrawn position to allow free, unrestricted access through the door when required - making it ideal for high-traffic commercial environments during business hours.

Supplied with a euro-profile cylinder as standard, the kit is keyed alike and includes one key. It is suitable for doors with a thickness of 40mm to 70mm, and comes complete with fixings suitable for both timber and metal doorsets.

This kit is available in multiple finishes, manufacturer references, barcodes, and weights to seamlessly match your existing exit hardware. Please choose your preferred finish, weight, barcode, and manufacturer reference from the options below.

Technical Specifications

- **Brand:** Briton

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
