Specification Summary

Brand	Briton
Product type	Panic Latch

Product Description

The Briton 581 Slimline Push Pad Panic Latch is a high-performance emergency exit device designed for single doors or in combination on double doors. It provides reliable single-point locking as standard, but can easily be expanded to multi-point locking using compatible Pullman latch kits.

Engineered for heavy-traffic environments, this push pad latch features a robust construction and a slimline body width of just 42.8mm, making it suitable for a wide range of door widths. It is fully certified for emergency exit applications and has been fire-tested for up to 2 hours on both timber and steel doors. The non-handed, reversible design ensures easy installation on left- or right-handed doors.

This product is available in multiple finishes, including Black and Silver Enamelled, with corresponding manufacturer references. Please choose your preferred finish, fire testing specification, standards, and manufacturer reference from the options below.

Technical Specifications

- **Body Width:** 42.8mm
- **Max Door Weight:** Suitable for doors up to 200kg
- **Handing:** Reversible (non-handed)
- **Security Grade:** Grade 5 (5,000N side load resistance)

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
