Product Description

The Briton 4211.SS Extended Bathroom Turn and Indicator Set is a high-quality door furniture accessory designed for both commercial and residential bathroom applications. Crafted from durable Grade 304 stainless steel with a sleek satin finish, this set is specifically engineered to complement Briton 4200 Series lever sets.

Featuring an extended thumbturn, this model offers a longer turning point to ensure effortless operation and improved accessibility. The set is supplied as a complete pair, including both the interior turn and the exterior indicator with an emergency release. To maintain a clean, modern aesthetic, it features matching push-on rose

covers that completely conceal all bolt-through fixings.

Engineered to meet rigorous safety standards, this turn and indicator set is fire-tested to BS EN 1634, offering up to 2 hours of protection on timber doors and up to 4 hours on steel doors. It is supplied with an 8mm bathroom spindle, fits doors from 38mm to 54mm thick, and is backed by a 5-year manufacturer's guarantee.

Technical Specifications

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
