Product Description

The Briton Fixing Pack (4200.5.FP) is a high-quality hardware accessory kit designed specifically for use with Briton 4200 Series lever sets. This pack provides a reliable solution for door installations, featuring a 5mm x 60mm spindle and two 5mm to 8mm spindle adapter sleeves.

It is engineered to allow Briton bathroom escutcheons 4210 and 4211 to be used seamlessly on locks with 5mm followers. Suitable for standard 44mm thick doors, this fixing pack ensures a secure, precise fit and smooth, long-lasting operation.

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
