Product Description

The Briton Mortice Key Profile Escutcheon Pair (4214.8.SS) is a premium architectural hardware accessory designed to provide a clean and professional finish to your doors. Crafted from high-grade 304 stainless steel with a sleek satin finish, these escutcheons are specifically designed to complement the Briton 4200 Series lever furniture range. They feature a standard UK mortice key profile cut-out, making them ideal for use with traditional lever locks.

Engineered for both style and durability, this pair of escutcheons includes matching push-on covers that completely conceal all fixings, ensuring a seamless, tamper-resistant look. They are highly versatile, suitable for doors with a thickness ranging from 38mm to 54mm, and utilize secure bolt-through fixings.

In addition to their aesthetic appeal, these escutcheons are built to meet demanding safety standards. They are fully fire-tested to EN 1634, offering up to 2 hours of protection on timber fire doors and up to 4 hours on steel fire doors. Backed by a 5-year manufacturer's guarantee, they are a reliable choice for both commercial and domestic applications.

Brand Profile

Briton

Briton is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
