### Product Description

The Briton 4203.19.SS Straight Lever on Rose is a high-quality, durable door handle from the renowned Briton 4200 Series. Precision-manufactured from Grade 304 stainless steel, this straight round bar lever offers a sleek, contemporary aesthetic that complements any modern commercial or residential interior.

Designed for everyday reliability, the lever is prefixed to an 8mm thick sprung rose, ensuring a smooth and consistent return to the horizontal position. It has been extensively tested to meet rigorous safety and durability standards, including fire testing to EN 1634. This makes it suitable for up to 2-hour timber fire doors and up to 4-hour steel fire doors.

The handles are supplied as a pair, complete with an 8mm spindle and M4 bolt-through fixings to accommodate doors between 38mm and 54mm thick. With a satin stainless steel finish, a reversible design, and a 5-year manufacturer's guarantee, this lever handle provides a robust and stylish solution for high-traffic environments.

## Technical Specifications

- **Manufacturer Reference:** 4203.19.SS
- **Material:** Grade 304 Stainless Steel
- **Finish:** Satin Stainless Steel

- **Handle Diameter:** 19mm
- **Handle Length:** 135mm
- **Rose Diameter:** 50mm

## Brand Profile

Briton

**Briton** is a long-established UK door hardware brand best known for **door controls** and **exit hardware** used in commercial buildings where reliability and fire-safety compliance actually matter. Briton markets itself as having **over 100 years** of history in the sector, with a reputation built on “highly engineered” products designed to survive constant, unglamorous punishment in busy environments.

Today, **Briton is part of Allegion** (the global security group behind multiple access and door hardware brands). In the Allegion portfolio, Briton sits as a specialist name for door control and emergency exit solutions.

What Briton is typically associated with in the trade/spec world:

- **Overhead door closers** (including their long-running “classic” closer heritage)
- **Panic and emergency exit devices** such as push bars and push pads, designed and tested to standards like **EN 1125** (panic) and **EN 179** (emergency exit) depending on application
- A broader ecosystem that now extends into related **locks, cylinders, door furniture and accessories** under the Briton hallmark

Fun bit of heritage trivia that specs people love: sources discussing Briton’s classic door closer lineage note early Briton closers being manufactured by **William Newman & Sons Ltd in Birmingham** in the **1930s**, and that the traditional style still shows up in places like historic properties.
