Specification Summary

Brand	Burton Safes
Product type	Key Safe

Product Description

The Burton Keyguard Digital XL is a high-security outdoor key safe designed to provide a secure external key storage solution. It is ideal for properties where access is required by care workers, cleaners, workmen, or family members. As the world's first key safe certified to the rigorous LPS1175 Issue 8 A5 standard, it offers industry-leading physical attack resistance.

This robust key safe is also approved by Secured by Design, the official UK Police security initiative, meeting Police Preferred Specifications. It features a user-friendly 12-button digital keypad with over 4,000 possible code combinations, allowing you to set and change your own code easily.

Designed for durability, the Keyguard Digital XL is supplied with a weather-resistant rubber cover that protects the keypad from the elements and doubles as a convenient fixing template for quick installation. It is certified for fixing to rendered walling and includes an internal key hook with space to securely store 2-3 standard cylinder keys.

Technical Specifications

- **Brand:** Burton Safes
- **Model:** Keyguard Digital XL (L25207)
- **External Dimensions:** 160mm (H) x 95mm (W) x 56mm (D)

Brand Profile

Burton Safes

Burton Safes is a Yorkshire-rooted UK security manufacturer/supplier best known for **safes, vaults and high-security physical storage**, serving the **locksmith, trade, commercial and banking** markets. The business was **founded in 1990** in **Kirkburton (near Huddersfield, West Yorkshire)**—famously starting with the founder **Norman Berry selling safes from his garage**, initially supplying churches and the locksmith trade.

Over time Burton expanded from domestic and small commercial safes into a broader “physical security solutions” portfolio including **certified safes, vaults/strong rooms, security doors, safe deposit boxes, and ATM-related security**, with a consistent emphasis on **independent testing and certification to UK/European standards**.

In **January 2020**, Burton Safes acquired/merged with the **Leeds-based Safe & Vault group**, forming what they described as **Yorkshire’s largest specialist security company**, with Burton acting as a key distribution arm and Safe & Vault providing installation/engineering/service capability.

They also highlight industry participation and credentials: Burton states it’s part of **The Trusted Security Group**, and notes memberships/engagement with bodies such as **Eurosafe UK** (founder member), **ESSA**, and the police-backed **Secured by Design** initiative (among others).
