Specification Summary

Brand	Cisa
Product type	Escutcheon & Rose

Product Description

The CISA 06012 Euro Profile Cylinder Escutcheon is a slim and versatile door accessory designed to provide a clean, professional finish around euro cylinder locks. Its narrow profile makes it an ideal, space-saving choice for a wide variety of domestic and commercial door applications.

This high-quality escutcheon is available in a choice of finishes, including Satin Brass and Nickel Plated, allowing you to match your existing door furniture perfectly. Depending on your installation needs, you can also choose between a single pack or a pair. Please select your preferred finish and pack quantity from the options below.

With a length of 60mm, a width of 28mm, and standard 44mm fixing centres, the CISA 06012 offers a straightforward and effective solution for protecting and tidying up cylinder cut-outs on your doors.

Technical Specifications

- **Manufacturer:** CISA
- **Profile:** Euro Profile Cylinder

Brand Profile

Cisa

CISA (Costruzioni Italiane Serrature e Affini) is an iconic **Italian lock and access-control brand**, founded in **1926** by **Luigi Bucci**. It built its reputation early by **patenting the first electrically controlled lock** the same year it was founded—basically kicking the door open (politely, with a latch) on modern electromechanical access control.

Today CISA positions itself as "**CISA Italy**," with **design and engineering made in Italy**, and a product ecosystem that spans both **mechanical and electronic security** for **residential, public, and commercial buildings**.

Ownership / group: CISA is a **strategic brand of Allegion** and has been part of the Allegion group **since 2013** (around the time Allegion became a standalone listed company).

What they're known for (in the real world, on real doors):

- **Mechanical locks and cylinders**, including solutions for master keying systems (CISA talks a lot about cylinders/keys and master-key systems production).
- **Electric / electromechanical locks** (heritage category for them), including locks designed to pair with **panic hardware** or remote electric opening in access-control setups.
- **Exit / panic devices** (their ranges are explicitly positioned around installability and reliability, and they're tracking new EU regulatory changes in their comms).
