### Product Description

The CISA 06300 Padlock Hasp is a heavy-duty security solution designed to provide robust protection for doors up to 44mm thick. Constructed for high-strength applications, this through-bolt hasp is supplied complete with backing plates and secure bolt fixings, ensuring a solid and tamper-resistant installation.

This versatile padlock hasp is available in multiple configurations to accommodate different padlock sizes. It features a choice of shackle diameters - either 14mm or 18mm - allowing you to select the perfect fit for your security requirements. Please choose your preferred shackle diameter, manufacturer reference, and barcode from the options below.

Whether securing gates, sheds, or warehouse doors, the CISA 06300 offers reliable, heavy-duty performance to keep your property safe.

## Brand Profile

Cisa

**CISA** (Costruzioni Italiane Serrature e Affini) is an iconic **Italian lock and access-control brand**, founded in **1926** by **Luigi Bucci**. It built its reputation early by **patenting the first electrically controlled lock** the same year it was founded—basically kicking the door open (politely, with a latch) on modern electromechanical access control.

Today CISA positions itself as "**CISA Italy**," with **design and engineering made in Italy**, and a product ecosystem that spans both **mechanical and electronic security** for **residential, public, and commercial buildings**.

**Ownership / group:** CISA is a **strategic brand of Allegion** and has been part of the Allegion group **since 2013** (around the time Allegion became a standalone listed company).

**What they're known for (in the real world, on real doors):**

- **Mechanical locks and cylinders**, including solutions for master keying systems (CISA talks a lot about cylinders/keys and master-key systems production).
- **Electric / electromechanical locks** (heritage category for them), including locks designed to pair with **panic hardware** or remote electric opening in access-control setups.
- **Exit / panic devices** (their ranges are explicitly positioned around installability and reliability, and they're tracking new EU regulatory changes in their comms).
