Specification Summary

Brand	Cisa
Product type	Open Shackle

Product Description

The CISA 22010 KD Open Shackle Brass Padlock delivers reliable everyday security with a classic design. Constructed with a solid brass body and a hardened steel open shackle, this padlock offers strong resistance to corrosion and cutting. It is ideal for securing lockers, toolboxes, gates, sheds, and cabinets.

As a Keyed To Differ (KD) padlock, each lock operates with its own unique key, providing individual security and control. It features a smooth 5-pin locking mechanism and is supplied with two keys per lock.

This padlock is available in multiple sizes to suit your specific security needs. Please choose your preferred body width, shackle diameter, and clearance options from the selection below.

Brand Profile

Cisa

CISA (Costruzioni Italiane Serrature e Affini) is an iconic **Italian lock and access-control brand**, founded in **1926** by **Luigi Bucci**. It built its reputation early by **patenting the first electrically controlled lock** the same year it was founded—basically kicking the door open (politely, with a latch) on modern electromechanical access control.

Today CISA positions itself as "**CISA Italy**," with **design and engineering made in Italy**, and a product ecosystem that spans both **mechanical and electronic security** for **residential, public, and commercial buildings**.

Ownership / group: CISA is a **strategic brand of Allegion** and has been part of the Allegion group **since 2013** (around the time Allegion became a standalone listed company).

What they're known for (in the real world, on real doors):

- **Mechanical locks and cylinders**, including solutions for master keying systems (CISA talks a lot about cylinders/keys and master-key systems production).
- **Electric / electromechanical locks** (heritage category for them), including locks designed to pair with **panic hardware** or remote electric opening in access-control setups.
- **Exit / panic devices** (their ranges are explicitly positioned around installability and reliability, and they're tracking new EU regulatory changes in their comms).
