Specification Summary

Brand	Cisa
Product type	Open Shackle

Product Description

The CISA 22010 MK Open Shackle Brass Padlock is a versatile, everyday security solution designed for organisations requiring individual key access alongside centralised master control. Featuring a solid brass body and a hardened steel shackle, it provides reliable protection for gates, lockers, cabinets, and general-use applications. It is an excellent choice for schools, commercial premises, and facilities managing multiple access points.

This padlock is Master Keyed (MK) to the BCCG00 suite, meaning each lock operates with its own unique keys but can also be opened by a master key (available separately). Equipped with a smooth 5-pin cylinder mechanism, this 50mm padlock offers dependable security and resistance to wear and corrosion.

Technical Specifications

- **Body Width:** 50mm
- **Body Height:** 40mm
- **Body Depth:** 16mm
- **Shackle Diameter:** 8mm
- **Horizontal Clearance:** 30mm
- **Vertical Clearance:** 29mm

- **Locking Mechanism:** 5-pin cylinder
- **Keying:** Master Keyed (BCCG00 suite)
- **Keys Supplied:** 2 individual keys per lock (master key sold separately)
- **Body Material:** Solid brass
- **Shackle Material:** Hardened steel
- **Weight:** 280g

Key Features

- **Master Keyed Capability:** Each padlock has its own unique key but can be integrated into a master key system for centralised control.
- **Durable Construction:** Solid brass body offers excellent resistance to corrosion and wear.
- **Hardened Steel Shackle:** Open shackle design made of hardened steel for increased resistance to cutting and sawing.
- **Reliable Mechanism:** Features a smooth 5-pin cylinder for dependable daily operation.
- **Versatile Security:** Ideal for securing lockers, cabinets, gates, and general-use areas across schools, offices, and facilities.

Brand Profile

Cisa

CISA (Costruzioni Italiane Serrature e Affini) is an iconic **Italian lock and access-control brand**, founded in **1926** by **Luigi Bucci**. It built its reputation early by **patenting the first electrically controlled lock** the same year it was founded—basically kicking the door open (politely, with a latch) on modern electromechanical access control.

Today CISA positions itself as "**CISA Italy**," with **design and engineering made in Italy**, and a product ecosystem that spans both **mechanical and electronic security** for **residential, public, and commercial buildings**.

Ownership / group: CISA is a **strategic brand of Allegion** and has been part of the Allegion group **since 2013** (around the time Allegion became a standalone listed company).

What they're known for (in the real world, on real doors):

- **Mechanical locks and cylinders**, including solutions for master keying systems (CISA talks a lot about cylinders/keys and master-key systems production).
- **Electric / electromechanical locks** (heritage category for them), including locks designed to pair with **panic hardware** or remote electric opening in access-control setups.
- **Exit / panic devices** (their ranges are explicitly positioned around installability and reliability, and they're tracking new EU regulatory changes in their comms).
