Specification Summary

Brand	Cisa
Product type	Shutter Locks

Product Description

The CISA 41420 Shutter Lock is a robust security solution designed specifically for roller shutters. Ideal for commercial storefronts, industrial units, and domestic garages, this lock provides reliable physical security to keep your premises safe.

This key-operated lock features a double-throw facility, with both the first and second throws extending by 13mm to offer enhanced resistance against forced entry. It is supplied with three keys in total: two keys designed for operating the lock from the outside, and one key for operation from the inside.

Please note that this lock is handed and is not reversible. It is available in both Left Hand and Right Hand configurations; please select your required handing from the options below when ordering.

Technical Specifications

- **Brand:** CISA
- **Manufacturer Reference:** 41420
- **Lock Length:** 15.5cm
- **Cylinder Finish:** Polished Brass
- **Cylinder Projection:** 10mm

Brand Profile

Cisa

CISA (Costruzioni Italiane Serrature e Affini) is an iconic **Italian lock and access-control brand**, founded in **1926** by **Luigi Bucci**. It built its reputation early by **patenting the first electrically controlled lock** the same year it was founded—basically kicking the door open (politely, with a latch) on modern electromechanical access control.

Today CISA positions itself as "**CISA Italy**," with **design and engineering made in Italy**, and a product ecosystem that spans both **mechanical and electronic security** for **residential, public, and commercial buildings**.

Ownership / group: CISA is a **strategic brand of Allegion** and has been part of the Allegion group **since 2013** (around the time Allegion became a standalone listed company).

What they're known for (in the real world, on real doors):

- **Mechanical locks and cylinders**, including solutions for master keying systems (CISA talks a lot about cylinders/keys and master-key systems production).
- **Electric / electromechanical locks** (heritage category for them), including locks designed to pair with **panic hardware** or remote electric opening in access-control setups.
- **Exit / panic devices** (their ranges are explicitly positioned around installability and reliability, and they're tracking new EU regulatory changes in their comms).
