Product Description

The Cisa AM Series Key is a high-quality, professional key-cutting service designed to provide precise replacements or spare keys for your Cisa dimple cylinder locks. These keys are commonly used with high-security Cisa Asix and Asix Pro 6-pin cylinders, which are widely fitted on residential and commercial doors.

Cisa AM series keys feature a single row of dimples drilled into the blade. To order a replacement, you simply need to locate the unique key code engraved on the head of your existing key or printed on your plastic security card. A valid code for this series will always end with the letters 'AM' (for example, H12345AM or B26410AM).

To place your order, enter your exact key code into the box provided, select the quantity you require, and add them to your basket. Our specialist key-cutting department will then cut your keys to code using state-of-the-art

machinery, ensuring a perfect and smooth operation.

Technical Specifications

- **Key Type:** Dimple key (single row of dimples)
- **Compatible Brand:** Cisa
- **Key Code Format:** Ends with 'AM' (e.g., H12345AM)
- **Cutting Method:** Cut to code

Key Features

- **Precision Cut to Code:** Cut using advanced electronic machinery to ensure a smooth and reliable operation
- **Convenient Ordering:** No need to send us your physical key; simply enter your 'AM' code online
- **Durable Construction:** Made from high-quality materials for long-lasting performance
- **Reliable Spares:** Ideal for creating high-quality duplicate keys for family members, tenants, or employees

Brand Profile

Cisa

CISA (Costruzioni Italiane Serrature e Affini) is an iconic **Italian lock and access-control brand**, founded in **1926** by **Luigi Bucci**. It built its reputation early by **patenting the first electrically controlled lock** the same year it was founded—basically kicking the door open (politely, with a latch) on modern electromechanical access control.

Today CISA positions itself as "**CISA Italy**," with **design and engineering made in Italy**, and a product ecosystem that spans both **mechanical and electronic security** for **residential, public, and commercial buildings**.

Ownership / group: CISA is a **strategic brand of Allegion** and has been part of the Allegion group **since 2013** (around the time Allegion became a standalone listed company).

What they're known for (in the real world, on real doors):

- **Mechanical locks and cylinders**, including solutions for master keying systems (CISA talks a lot about cylinders/keys and master-key systems production).
- **Electric / electromechanical locks** (heritage category for them), including locks designed to pair with **panic hardware** or remote electric opening in access-control setups.
- **Exit / panic devices** (their ranges are explicitly positioned around installability and reliability, and they're tracking new EU regulatory changes in their comms).
