Specification Summary

Brand	Cisa
Product type	Accessory

Product Description

The CISA Long Connecting Tail Bar is a high-quality replacement or extension bar designed for use with most standard rim night latch cylinders (Yale-type cylinders). Measuring 80mm in length, this extra-long tail bar is the ideal solution for installing rim cylinders on exceptionally thick timber doors where standard tail bars are too short.

With this 80mm tail bar, a standard rim cylinder can typically accommodate doors up to approximately 100mm thick. It is highly versatile and can easily be cut down to the precise length required for your specific installation.

Please note that this product includes the connecting tail bar only; the cylinder is not included.

Technical Specifications

- **Brand:** Cisa
- **Manufacturer Reference:** LT/YC (also known as 07564/L4980)
- **Part Number:** L4980
- **Length:** 80mm
- **Weight:** 8g
- **Pack Quantity:** 1
- **Packaging:** Loose

- **Compatibility:** Suitable for most standard rim cylinders

Key Features

- **Extra-Long Design:** At 80mm, it is ideal for thicker doors up to approximately 100mm deep.
- **Cut to Size:** Can be easily cut down to the exact length required for a perfect fit.
- **Universal Compatibility:** Works with most standard rim night latch cylinders.
- **Genuine CISA Quality:** Reliable construction from a trusted brand in security hardware.

Brand Profile

Cisa

CISA (Costruzioni Italiane Serrature e Affini) is an iconic **Italian lock and access-control brand**, founded in **1926** by **Luigi Bucci**. It built its reputation early by **patenting the first electrically controlled lock** the same year it was founded—basically kicking the door open (politely, with a latch) on modern electromechanical access control.

Today CISA positions itself as "**CISA Italy**," with **design and engineering made in Italy**, and a product ecosystem that spans both **mechanical and electronic security** for **residential, public, and commercial buildings**.

Ownership / group: CISA is a **strategic brand of Allegion** and has been part of the Allegion group **since 2013** (around the time Allegion became a standalone listed company).

What they're known for (in the real world, on real doors):

- **Mechanical locks and cylinders**, including solutions for master keying systems (CISA talks a lot about cylinders/keys and master-key systems production).
- **Electric / electromechanical locks** (heritage category for them), including locks designed to pair with **panic hardware** or remote electric opening in access-control setups.
- **Exit / panic devices** (their ranges are explicitly positioned around installability and reliability, and they're tracking new EU regulatory changes in their comms).
