Brand	Codelocks
Product type	CL200 Series

Product Description

The CL0200 MB Surface Deadbolt Digital Lock from the Marine by Codelocks 200 series is a premium, light-duty mechanical digital lock designed for both internal and external installations. Engineered to withstand the harshest outdoor conditions, this lock has undergone rigorous 1,000-hour salt spray testing and comes complete with neoprene seals, making it an ideal choice for coastal environments, marinas, and outbuildings.

This lock features a sleek black finish with robust stainless steel buttons. It operates via a surface deadbolt, which is manually retracted using the outside knob once the correct code is entered, and can be operated freely from the inside at all times. With over 8,000 non-sequential code combinations available (typically 4 to 6 digits) and a tumbler alignment system, changing the access code is simple and straightforward.

Designed to fit doors between 35mm and 65mm thick, this non-handed lock is fully reversible to suit both left and right-handed doors. It provides a highly durable, keyless access control solution where reliable weather protection is paramount.

Technical Specifications

- **Brand:** Codelocks
- **Finish:** Black with stainless steel buttons
- **Door Thickness:** 35mm to 65mm
- **Code Length:** 4 to 6 digits
- **Combinations:** 8,000+ (up to 8,191 non-sequential combinations)

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
